

BUILDING INTEGRATION WITH REST ADAPTER:

IN THIS WE ARE ONLY SENDING REST BASED REQUEST IN THE FORM OF XML FILE

GO TO OIC DOC TO READ THE PROCESS>

FIRST CREATE CONNECTION>NAVBAR>CONNECTIONS>CREATE>REST>

In Oracle Integration Cloud (OIC), we "trigger" an integration to make things happen automatically between different systems.

Create Connection

REST

What is it called?

The Name can be changed later. The Identifier can be set only now and it must be unique.

* Name

* Identifier

Keywords

Select what role this connection will play in integrations.

* Role

Description

1024 characters left

OIC_REST_Trigget CONFIGURED

REST Connection

REST

Connection details are already configured and the connection is ready to be used.

Role(s)
Trigger

Security

Security to specify the login credentials to access your application/endpoint.

Security Policy

Basic Authentication

100% CONFIRMATION

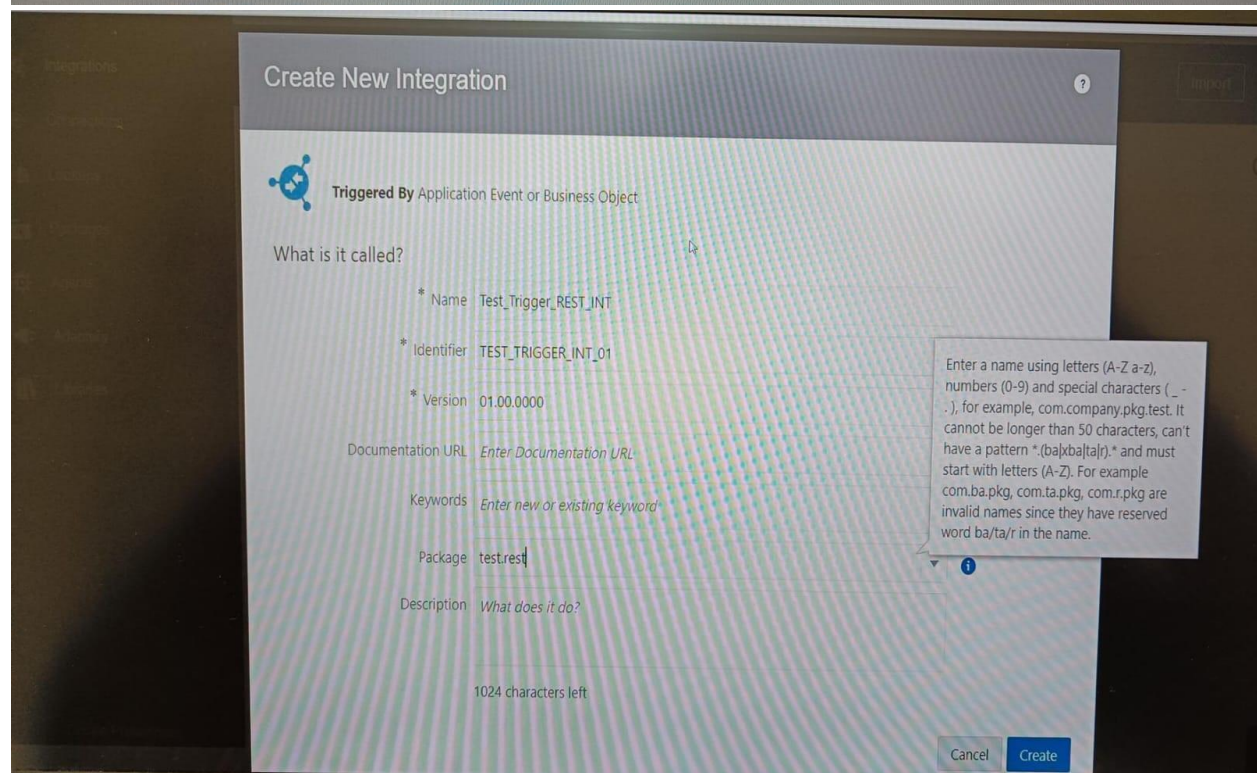

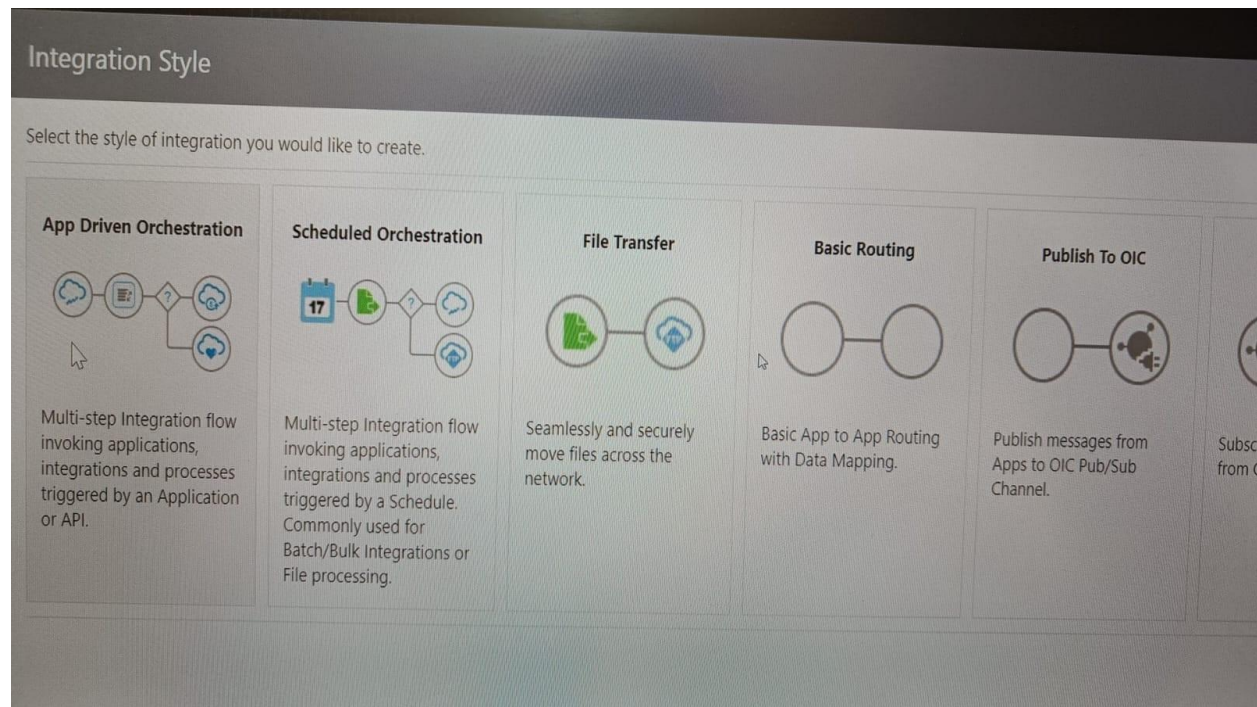

Connection **OIC_REST_Trigget** was tested successfully

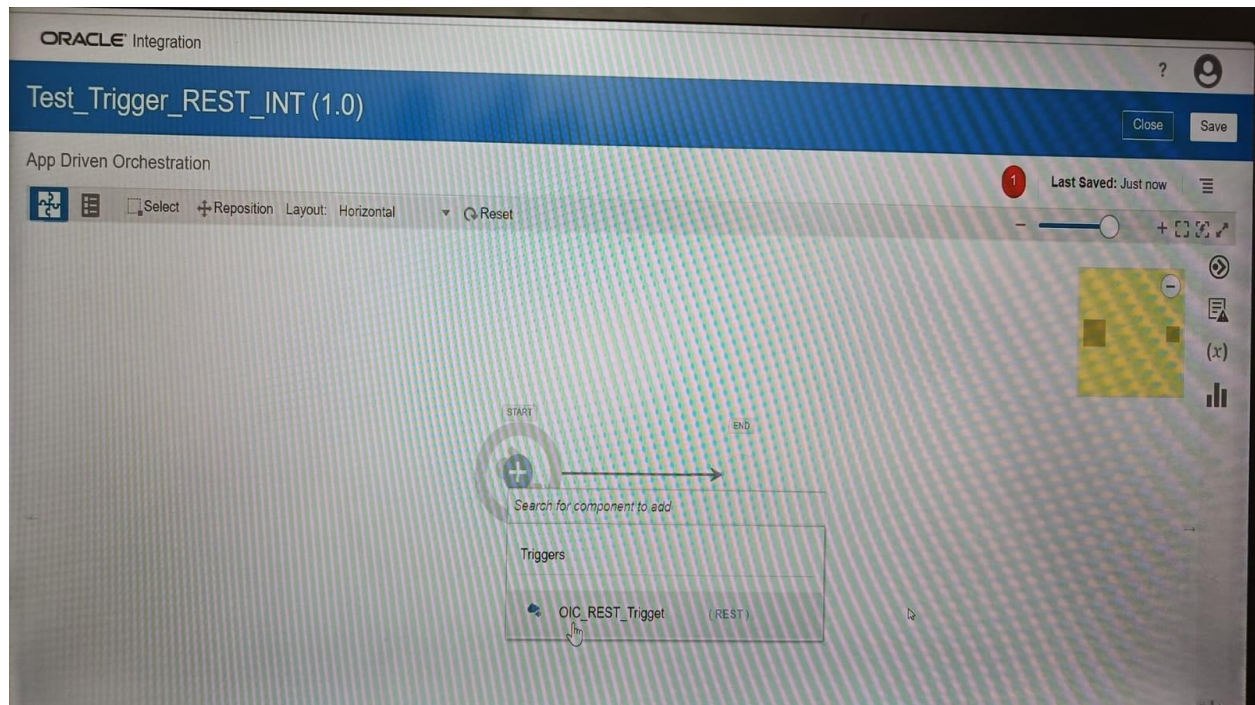

- The username and password are not validated as part of this test. You must validate them separately before using them with this security policy.

CONNECTION HAS BEEN CREATED.

NOW CREATE INTEGRATION:

GO TO NAVBAR>INTEGRATIONS>CREATE>

When you're creating an integration in **Oracle Integration Cloud (OIC)** and configuring a **REST endpoint**, you're setting up the connection between OIC and an external RESTful service (e.g., a web service or an API) that will either send or receive data.

Configure REST Endpoint

Help ▾ < Back Next > Cancel Done

**Welcome to the REST Endpoint Configuration Wizard**
This wizard helps you configure an endpoint using the REST adapter

Operations
Summary

* Provide an operation name

default

What does this operation do?

testing trigger rest

* What is the endpoint's relative resource URI?

/test

* What action do you want to perform on the endpoint?

POST ▾

Based on your selections, you can add parameters or configure a request and/or response for this endpoint.

Select any options that you want to configure:

☐ Add and review parameters for this endpoint

☒ Configure a request payload for this endpoint

☐ Configure this endpoint to receive the response
