In Oracle XML Publisher (now known as Oracle BI Publisher), XDO functions are used within the templates to manipulate and format data. These functions enable you to perform various tasks such as calculations, string manipulations, and date formatting within your RTF (Rich Text Format) templates.

Functionality	XDO Functions
Sysdate : Current Date	<?xdofx:sysdate()?>
Addition	<?xdofx:11+3?>
Lpad	<?xdofx:lpad('HelloWorld',20,'*')?>
Decode	<?xdofx:decode('HI','HI','Hai','BI','Bye')?>
Current Time	<?xdoxslt:current_time('ja-JP', 'Asia/Tokyo')?>
Sub String	<?xdofx:substr('Hello Sub String',4,3)?>
Lower	<?xdofx:lower ('Hello World..Im in Lower')?>

Functionality	XDO Functions
Sysdate : Current Date	2016-12-20T01:39:30.485+00:00
Addition	14
Lpad	**********HelloWorld
Decode	Hai
Current Time	10:39:30
Sub String	lo
Lower	hello world..im in lower
