Default type of parameter determines what type of default value they can accept in our declared parameter.

Default type :

1. Constant :
   In this default value can be set as character to show it in the parameter.
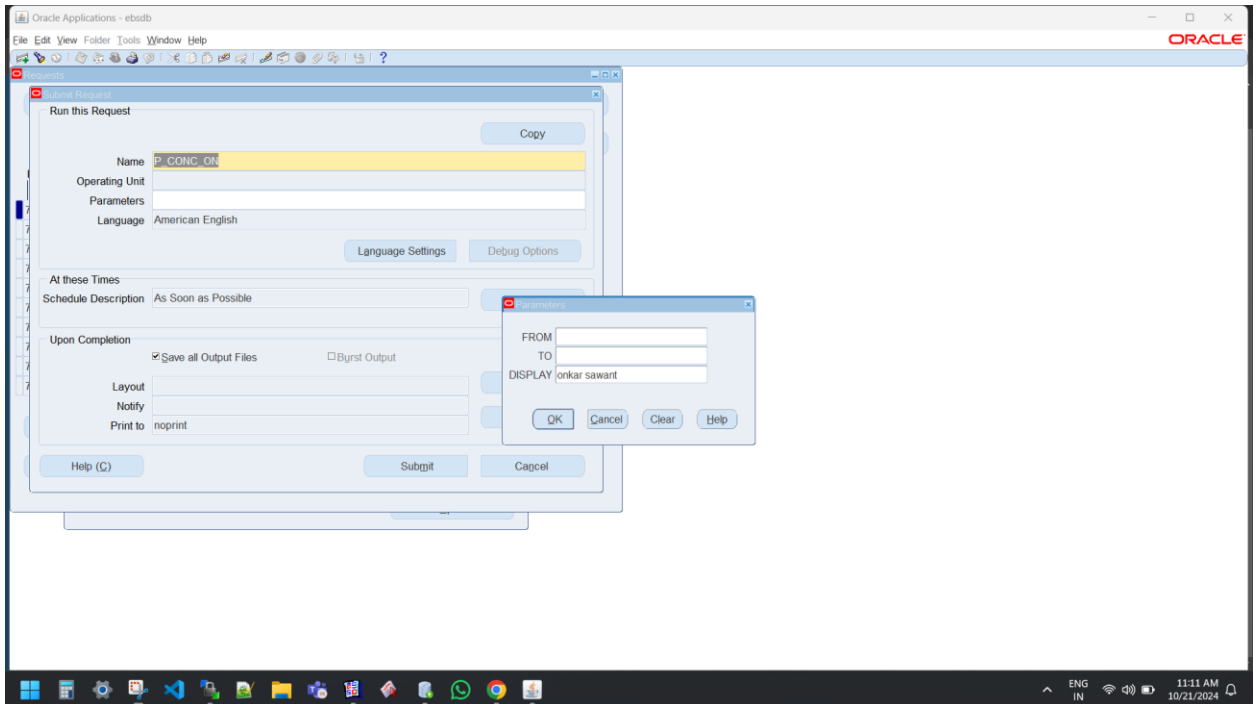

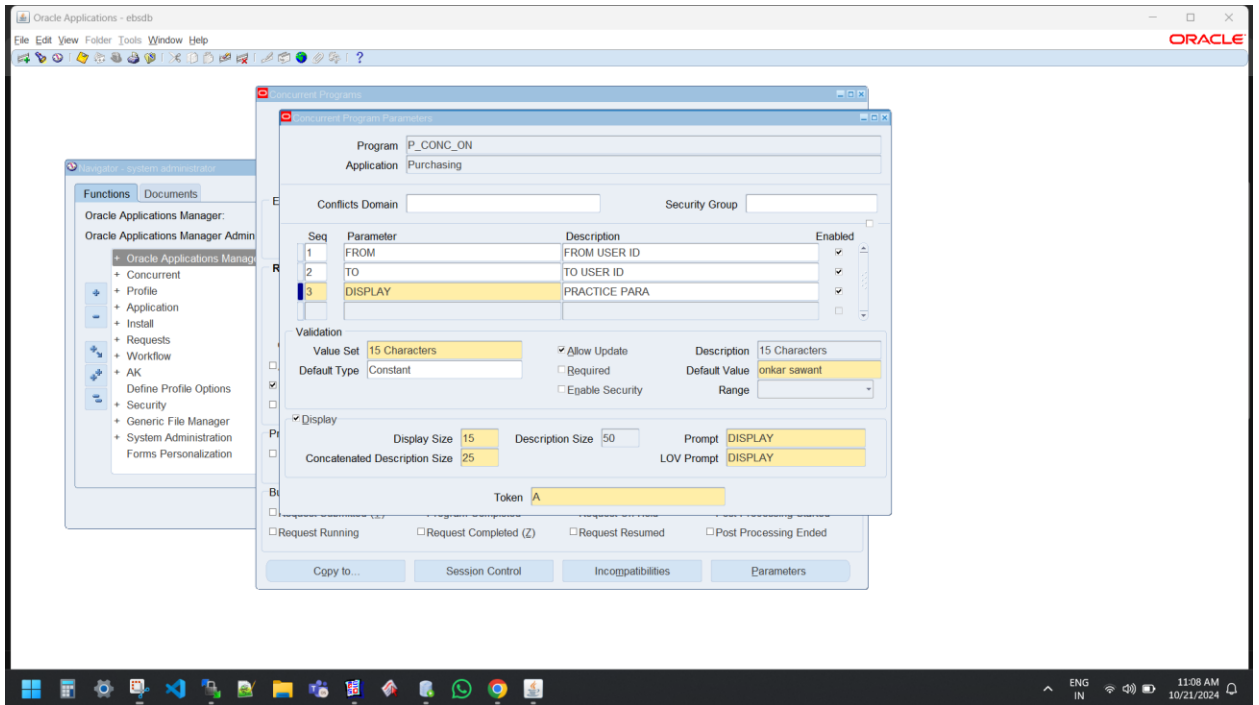

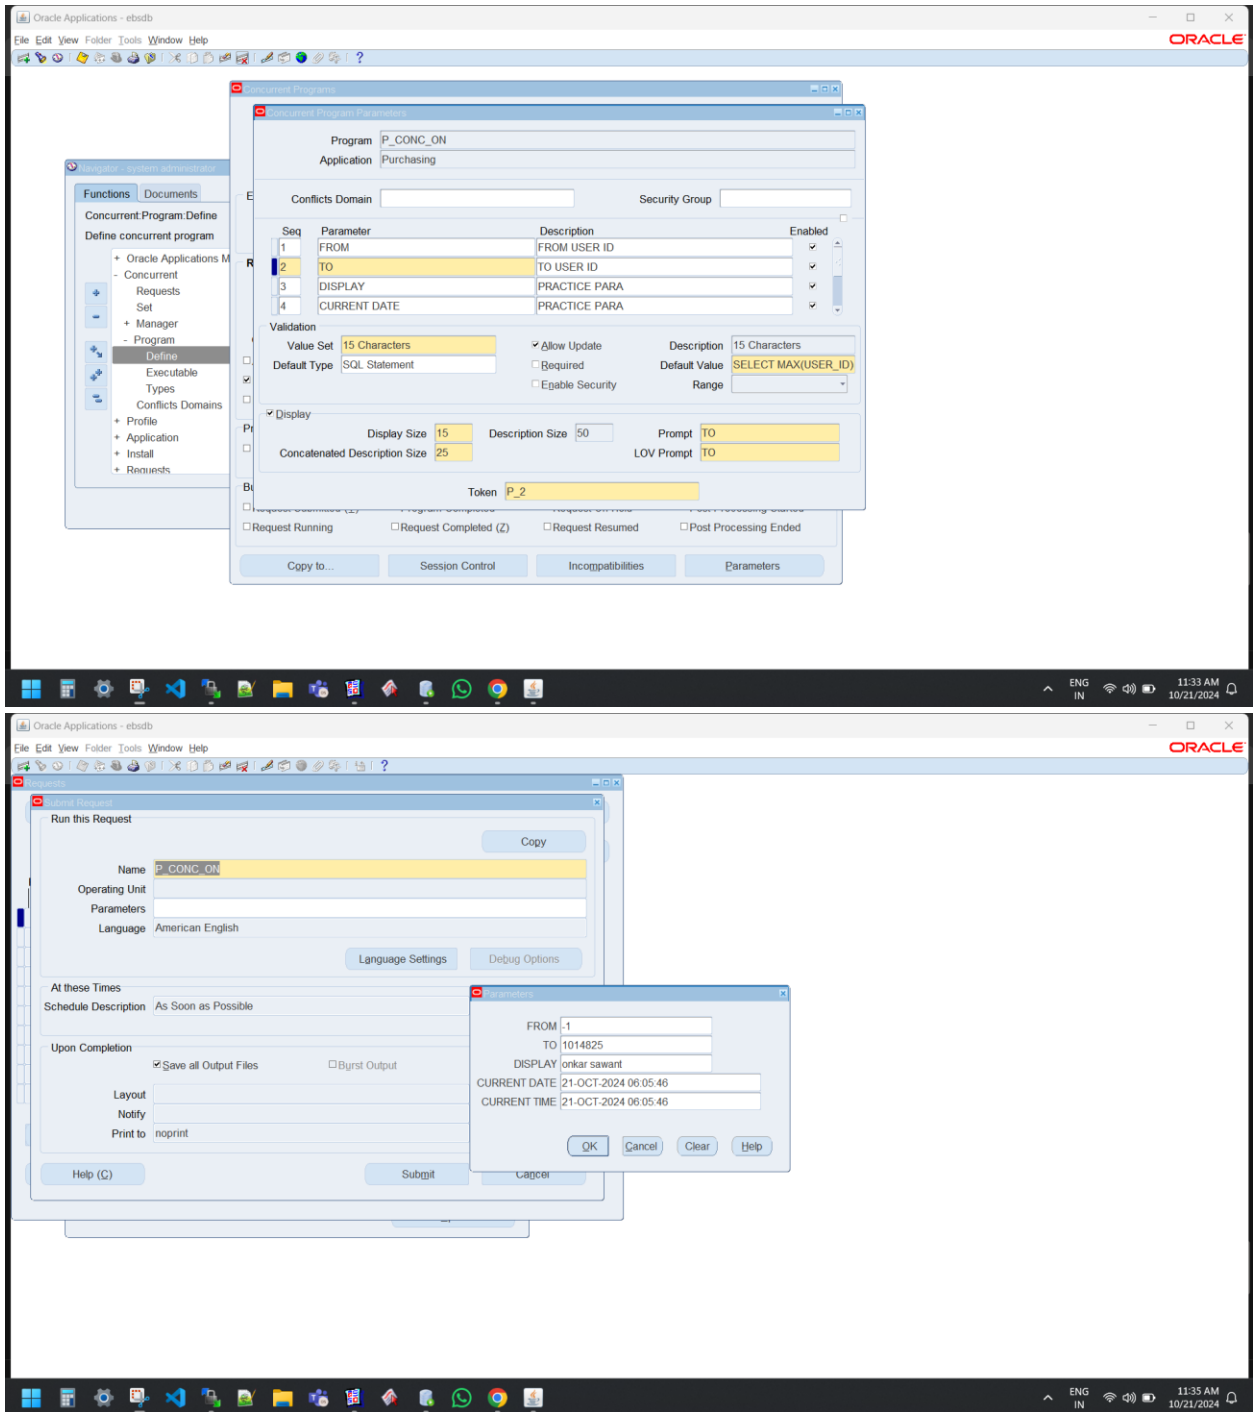

2. Current date/TIME

Shows curr date/TIME val in parameter.
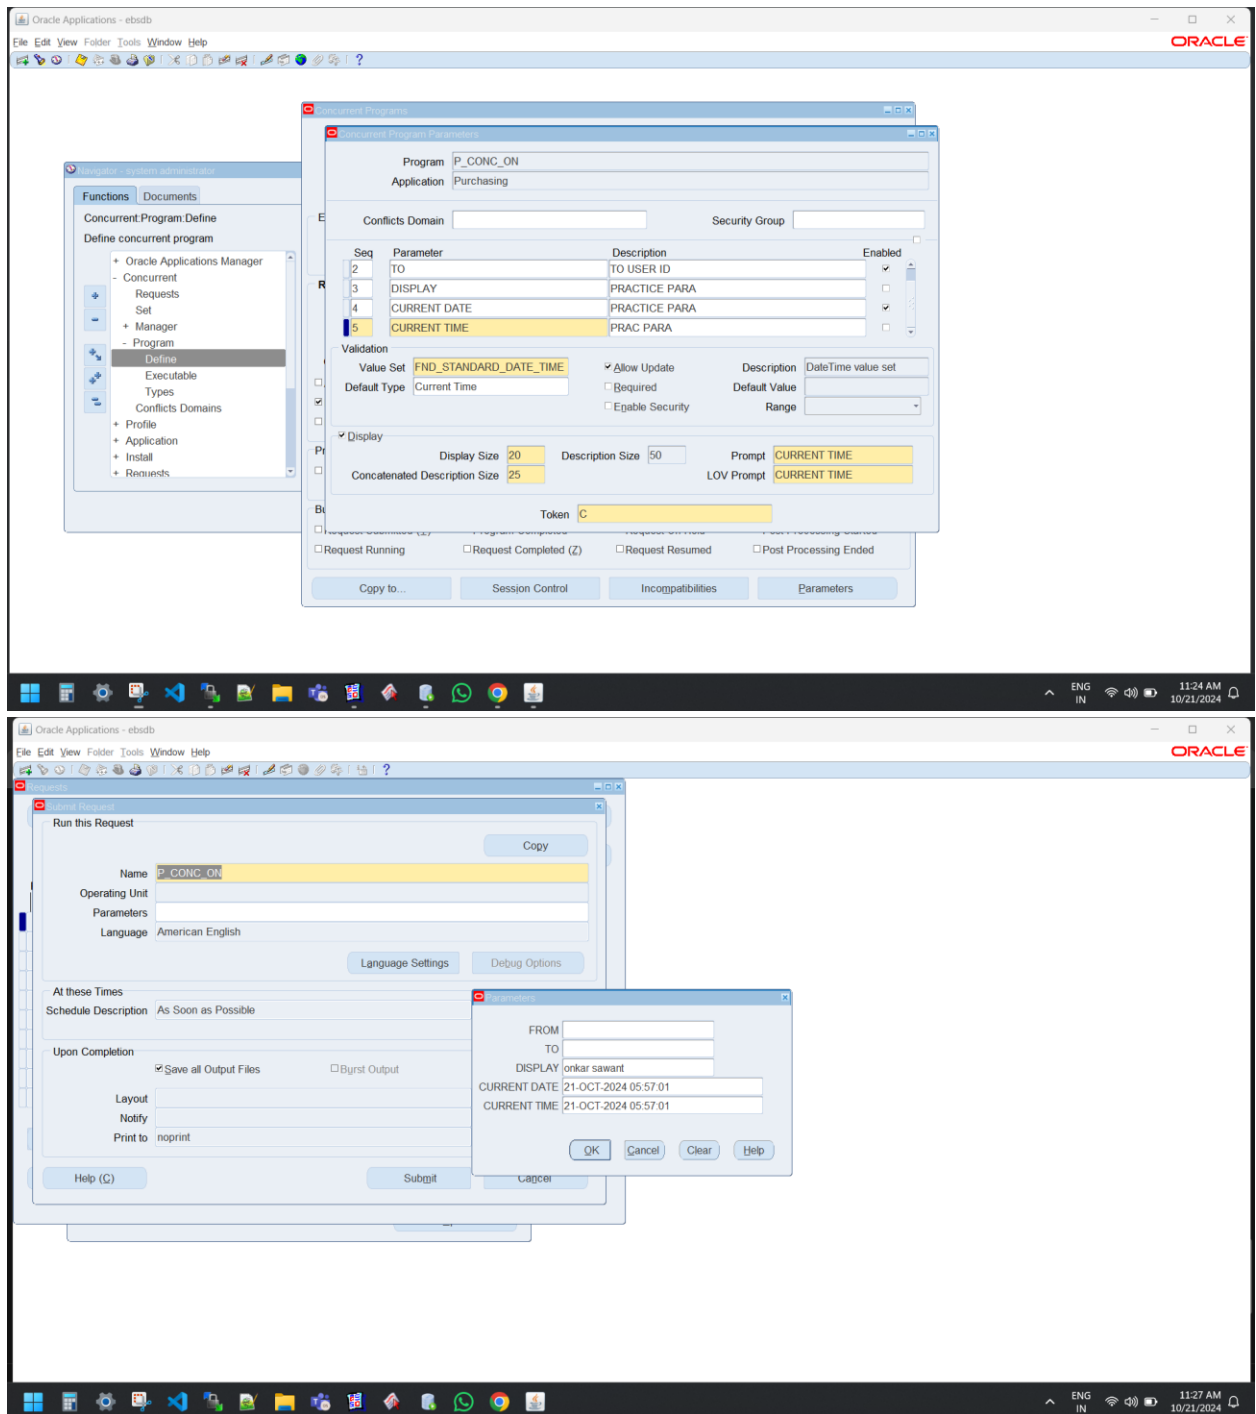

3. Sql statement

   We can write sql statement in default value box which gives us output and shows this o/p in para value.

   Q) CLIENT WANTS MIN(USER_ID) AND MAX(USER_ID) FROM FND_USER THEN WE CAN USE THIS IN PARA VALUE:

4. Segment

It saves the another parameter value in our targetted para.
